

# Hyrule Compendium API

An API serving data on all in-game items and regions in *Breath of the Wild* and *Tears of the Kingdom*

## Concept

The Hyrule compendium is an encyclopedia of all the in-game interactive items in the world of Hyrule. With this brilliant API, you can access its data and embed it into your own application.

Here is an example request and response, retrieving data on the white-maned lynel:

```
bash
$ curl https://botw-compendium.herokuapp.com/api/v3/compendium/entry/white-maned_lynel
{
  "data": {
    "name": "white-maned lynel",
    "id": 123,
    "category": "monsters",
    "description": "These fearsome monsters have lived in Hyrule since ancient times. Their ability to breathe fire makes Whi
```

## Try endpoint

Entry ID/Name:

[Send request](#)

```
json
{
  "data": {
    "category": "monsters",
    "common_locations": [
      "Hyrule Field",
      "Central Hyrule Depths"
    ],
    "description": "This common species is a nuisance all over Hyrule. While not very clever, they are at least intelligent enough",
    "dlc": false,
    "drops": [
      "bokoblin horn",
      "bokoblin fang"
    ],
    "id": 121,
